

Quyen Bui

Seattle, WA | (425)-748-4658 | btlquyenn@gmail.com | <https://quyenbui-portfolio.vercel.app>

EDUCATION

Master of Science in Computer Science, Data Science Specialization

Seattle University

Expected June 2026

GPA 3.5

Bachelor of Arts in Business Administration, Finance

Seattle University

Dec 2022

GPA 3.6

PROFESSIONAL EXPERIENCE

Graduate Data Science Intern | King County Metro, Seattle WA

June 2025 – Present

- Conducted exploratory and statistical analysis on GTFS data using R and SQL to identify high-demand corridors and uncover travel patterns, delivering a strategic roadmap to inform service frequency recommendations for FIFA World Cup 2026.
- Built scalable ETL pipelines using Python and pandas to ingest, clean, and transform geospatial API data in Databricks, reducing manual validation time by 20% across recurring bi-annual updates.
- Developed predictive models (linear regression, time series) using scikit-learn to assess on-time performance across 140+ corridors and presented findings to leadership, influencing \$13M in reliability investment.
- Led discovery sessions with 5+ stakeholders to scope requirements for an AI-powered analytics tool, translating business needs into a prioritized product roadmap.

Teaching Assistant | Seattle University, Seattle WA

March 2026 – Present

- Held 3 office hours per week for a 100-students graduate Machine Learning course, explaining concepts in supervised learning, feature engineering and model evaluation for 30+ students per session, earned 4.9/5.0 in mid-quarter feedback.
- Mentored students on Python-based ML projects covering data preprocessing, feature selection, cross-validation and performance analysis using NumPy, pandas and scikit-learn.

Project Management Assistant | ITS Seattle University, Seattle WA

Nov 2024 – Present

- Built and maintained 5+ Power BI dashboards with automated data refresh and scheduled reporting, delivering real-time insights to cross-functional stakeholders optimizing resource allocation decisions.
- Validated migrated data across 10,000+ employee and student records, reconciling discrepancies between legacy systems and Workday to ensure 99% data accuracy.
- Designed data extraction pipelines using open-source LLMs (Qwen3 and Mistral) to structure data from 8000+ I-9 documents, achieving 40% improvement in processing efficiency and data.
- Coordinated User Acceptance Testing (UAT) for 50+ end users, tracking defects in Jira, and translated user feedback into actionable product improvements and implementation plans.
- Developed 7+ Power Automate workflows to streamline KPIs tracking and project reporting, improving stakeholder visibility on project status and operational efficiency.
- Supported Agile delivery for Workday ERP migration by managing backlog, contributing to sprint planning in Jira, and coordinating across engineering, HR and payroll teams to meet system cutover milestones.

IT Service Desk Specialist | Seattle University, Seattle WA

Mar 2021 – Aug 2023

- Collaborated with System Engineers to conduct A/B testing on VDI configurations; analyzed login times and latency via hypothesis testing to validate performance gains, driving a 15% improvement in user retention.
- Created 30+ technical documents and training materials, standardizing workflows and improving knowledge sharing across teams.
- Resolved hardware and application issues for students and 250+ classrooms over phone, walk-ins and Jira ticketing, leveraging Azure Active Directory to streamline access management.

Finance & Accounting Intern | Truong Minh Hai Ltd, Vietnam

Jul 2019 – Dec 2019

- Analyzed transaction and inventory data using advanced Excel and SQL on WMS, identifying trends in sales and margin variance that boosted inventory turnover by 10% across all product categories.

PROJECTS

AI-Powered Analytics Tool (Capstone) | King County Metro

- Designed and implemented an AI-powered analytics tool using Ollama, Streamlit and NLP pipelines, enabling natural language querying over structured datasets.
- Tool was formally adopted by King County Metro, reducing manual analysis time by 35% and expanding self-service data access for non-technical stakeholders.

Best Place to Live — Seattle Neighborhood Rankings

- Analyzed multi-variable datasets across 20+ Seattle neighborhoods, applying weighted scoring to rank livability across transit, amenities, and housing costs — deployed as an interactive web app on Vercel.

TECHNICAL SKILLS

Language: Python, SQL, R, Typescript, HTML

BI & Visualization: Power BI, Tableau, ArcGIS, Plotly, MS Office Suite (Excel, PowerPoint, Word)

ML & Analytics: Statistical Analysis, Predictive Modeling, A/B Testing, Cross-Validation, Model Evaluation

Platforms and Tools: Databricks, Snowflake, PostgreSQL, Git, Power Automate, Streamlit, Jira
