

Quyen Bui

Seattle, WA | (425)-748-4658 | btlquyenn@gmail.com | quyenbui-portfolio.vercel.app

Professional Summary

Data Science graduate student with experience conducting exploratory data analysis(EDA), building data models, and developing scalable data pipelines to drive decision-making. Combine Python, SQL, and Databricks with automation and AI-driven tools to improve data quality and speed up analysis.

Education

Master of Science in Computer Science, Data Science Specialization Seattle University	GPA 3.7
Bachelor of Arts in Business Administration, Finance Seattle University	GPA 3.5

Professional Experiences

Graduate Data Science Intern | King County Metro, Seattle WA June 2025 – Present

- Conducted end-to-end EDA and feature engineering on Link ridership data using Python, developing data models and a production Power BI dashboard to monitor ridership patterns and drive planning decisions.
- Built scalable Python ETL pipelines to ingest and process geospatial data from the Foursquare API; implemented data quality validation and transformation in Databricks to curate community asset datasets.
- Designed and deployed an AI-enabled conversational analytics tool using LLMs, reducing manual analysis time by ~30% and enabling self-serve insights.
- Performed geospatial analysis using ArcGIS and SQL across 50+ routes to identify park-and-ride utilization gaps, directly supporting strategic service design for FIFA World Cup 2026.

Teaching Assistant | Seattle University, Seattle WA March 2026 – Present

- Supported instruction in core Machine Learning concepts including regression, classification, clustering, and model evaluation.
- Provided guidance on Python-based ML pipeline projects to help students improve model accuracy and evaluation approaches.

Data & Project Management Assistant | Seattle University, Seattle WA Nov 2024 - Present

- Developed and maintained Power BI dashboards analyzing hardware and software usage patterns across campus, enabling leadership to make data-driven resource reallocation decisions.
- Built an LLM-powered data extraction pipeline to structure data from thousands of I-9 documents, improving processing efficiency while maintaining accuracy when handling confidential employee data.
- Designed an automated workflow using Power Automate to monitor Confluence content freshness via metadata and trigger notifications for outdated pages, eliminating 20+ hours/month of manual tracking.
- Applied Agile and Waterfall methodologies to manage project timelines and delivered milestones while ensuring stakeholder expectations aligned.

IT Service Desk Specialist | Seattle University, Seattle WA Mar 2021 – Aug 2023

- Troubleshoot software and application issues for 250+ classrooms remotely and in-person via phone and Jira, leveraging Azure Active Directory to streamline access management.
- Created technical documentation and training materials, improving onboarding efficiency and knowledge sharing across teams.
- Collaborated with System Engineers to test and document the Redhawk Labs - virtual desktop environment, maintaining comprehensive guides and enabling a smooth rollout with minimal post-deployment issues.

Finance & Accounting Intern | Truong Minh Hai Ltd, Vietnam Jul 2019 – Dec 2019

- Performed exploratory analysis on transaction and inventory data using SQL and Excel to identify trends in sales and stock turnover and margin variability across product categories.
- Delivered data-driven insights on product performance and margin variability, supporting inventory optimization and purchasing decisions

Skills

Programming & BI: Python, R, SQL, PostgreSQL, Databricks, Excel, Power BI, Tableau, ArcGIS

Data engineering: ETL Pipeline Design, API Integration, Data Reconciliation, Data Quality Validation

Project Management and Platforms: Agile Methodologies, Scrum, Jira, MS Project, Smartsheet
